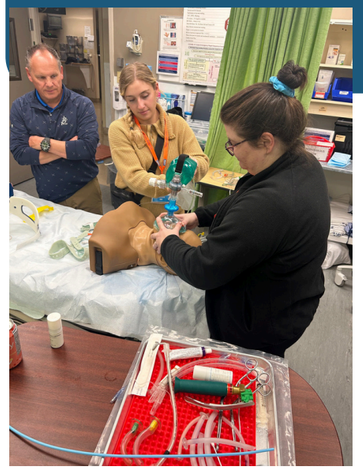
Provincial Trauma Course

TRAUMA NOVA SCOTIA

EHS Emergency Health Services LifeFlight | IWK Health | nova scotia health

Capacity per Course = 15
This course is open to individuals who are involved in the care of a trauma patient: staff physicians, nurse practitioners, RNs, paramedics, residents, respiratory therapists, LPNs.



Cost $4500

Includes: Lunch, Coffee, Snacks, Refreshments, Swag

Course Objectives

- Prepare and organize the trauma team and bay: focus on pre-brief.
- Identify local resources, limitations and barriers to providing care.
- Improve the confidence and ability of participants in the initial resuscitation of a trauma patient.
- Review and practice commonly used trauma skills.
- Define the relationship and answer questions related to the rural trauma facility and the regional trauma system.
- Establish the importance of effective communication amongst team members.
- Identify ongoing site-specific learning needs and develop a follow-up plan.

Participant Feedback

"This course should be mandatory for all emergency staff."

"This course is amazing- takes the ATLS principles and makes them applicable to rural ED"

"Great course structure and presentation of information. I learned a ton of new things that I plan to implement into my clinical practice"
